

It works!

If you need a specialist, I recommend my friends:

- BALLISTOL Animal:** Care product for animals.
- Stichfrei:** Protection from the sun and from midges
- Pluvonin: Gunex** Impregnation spray
- 2000: USTA** Rust protection and weapon oil
- Garage Oil:** Rust protection and lubrication oil
- Kamofix: Defenol** Fireplace and barbeque cleaner
- CS: Pfeffer-KO:** Defence spray
- BALSIN:** Defence spray
- Robla Solo Mil:** Wood and shaft oil / wood protection
- NEO-BALLISTOL** Weapon care / barrel cleaner
- Remedy Home:**
- Wellness Oils:** After-treatment for skin and scars
Relaxation and revitalisation

Your specialist dealer:

F.W. KLEVER GmbH • 84168 Aham
 Tel. +49(0)8744/96990 • Fax: +49(0)8744/969996
 www.ballistol.de • info@ballistol.de

Motorbike and vehicle maintenance, Free time

It is even more comfortable to reach your dealer with a motorbike or car. Particularly when it's cold, look forward to when the lock isn't frozen up and the door isn't stuck to the seal. I can obviously only prevent this if I am already there before the frost is and am used after every clean. In the car, I can replace the cockpit spray wherever it's used, on the fascia, on plastic, leather, metal... everything will gleam at you as soon as you get in the car.

Dear horseriders, fans of the outdoors and everyone I haven't mentioned. Please forgive me for not referring to you. Of course there are many other situations in which I can be very helpful but there simply isn't enough time to write them all here.

In the BALLISTOL story I take pleasure in explaining more about myself and my earlier adventures. Ask for me at your local dealer or in every chemist's shop (PZN 1474094).

Let me help you and gain a reliable friend.

Angling, hunting or shooting sports

Regardless of whether it's a fishing rod, reel, barrel, lock or a leather belt, everything can become clean and maintained again. Incidentally, my name comes from weaponry and was taken from the words ballistics and oleum (Latin for oil). I have always been a guarantee for clean weapons and accuracy. Copper, brass and other residues can all be easily removed from the barrel.

It is particularly good to spray the weapon straight after the hunt and then take the time to socialise afterwards. Basic care can then also easily be found the next day, as I care for metal in exactly the same way as wood and leather.

Do you know BALLISTOL and have had an almost unbelievable experience with it that is not yet in the BALLISTOL story? Then write to us and look forward to a free bottle of BALLISTOL spray!

Of course we can only consider submissions which do not contravene any laws (e.g. law on medical products).

It works!

Leather and wood care

Have a bit of help doing household chores! Of course, I am no fairy, doing my work at night when everyone is asleep. All I need is a little help from you.

I only want to lie back and relax after I've done my work, but caring for comfortable leather seats and everything else made from leather is problem-free. Just spray on, leave for a few minutes and rub off. Sleek leather already glistens like new and feels much smoother. Light leathers darken a touch. Incidentally, we can treat wooden surfaces at the same time too, because the wood also wants to be able to shine. Don't worry about BALLISTOL coming into contact with skin – it is the only universal oil with a “Very Good” dermatological rating.

Hinges, kitchen units, tool maintenance

After work, a little snack in the kitchen does wonders for everyone. With this opportunity, we can oil all hinges and everything that creaks and squeaks.

The bread slicer also likes a little drop of BALLISTOL. Sparks won't start flying as I work in a completely non-conducting way. And don't worry about “oil” in the kitchen: I have disinfecting qualities, kill off bacteria and even the food law says that I am food-safe and therefore completely harmless. Lots of drinks manufacturers also use me for maintaining their machinery.

Even if your kitchen knives don't usually rust, it normally happens with tools. Just spray a little BALLISTOL on them before you tidy them away.

Gardening equipment, plant protection, lawnmower.

It goes without saying that gardening equipment also needs care. It often all looks remarkably bad in the new year, and that's just before it starts to be used! So, the best thing to do is to clean them before winter and then spray on a bit of BALLISTOL before they hibernate. In the summer, you don't even need to think twice about thrusting the spade into the ground, as a purely natural product I keep out of trouble and disappear back in the natural cycle, right where I came from.

But not everyone likes me. Diluted in water and sprayed onto plants (around 3% BALLISTOL), I act against aphids and mites. Of course I'm also a friend of plants and don't affect them at all. Well, apart from grass as I also care for your lawnmower. It doesn't matter if it's a hand mower, electric mower or gas mower - everything that moves, or doesn't move, made from iron, oil-resistant plastic or rubber, is glad to meet me. I also love to meet all tools and equipment preparing for winter.

Sport equipment and bicycles

If I'm finally empty after being used in all of these situations, simply ride or drive to your nearest hardware dealer, weapon specialist or chemist's shop and ask for me. Or just buy me from the last place you found me.

Hopefully I had enough puff to oil and clean the chain, gears, axles, suspension forks and everything else on your bike, because it rides so much better afterwards. I am also great with other sports equipment, whether it be rollerblades, kickboards or fitness ski or snowboard equipment. Sport is fun!

I definitely don't cave in when given tough tasks. I can even reach the smallest of areas effortlessly thanks to my flow ability.

Over 100 years of quality!
