

BALLISTOL ALUMINIUM BURNISHING

Product features

Surface finish for bluing parts first-time or repairing minor surface damages.

Special features

Easily applied by brushing on
Permanent and abrasion-resistant
For aluminium alloys
Very efficient

Application / practical tips

Degrease the desired parts (e.g. with Ballistol Cold Degreaser or Gun Parts Cleaner). Fill a small amount of the Aluminium burnishing into a plastic cup or glass

Note: dispose of any leftovers properly

The application should be done at room temperature

Colour intensity depends on the alloy

Repeated application intensifies the hue to black

Coverage: approx. 100 ml/m²

Areas of application: burnishes scratches and friction marks on anodised components (e.g. scope mounts, hand guards on semi-automatic long rifles), also suitable for smaller complete components

Available as

50 ml

1 litre

art.no.

23110

23111

Physical and chemical characteristics

Appearance: dark red, clear

Odour: sweet, bitter almond

Relative density: 1- 1.1 g/cm³ (20°C)

Pressure 1013 mbar

Solubility in water: Easily soluble

Hazard statements

Causes severe skin burns and eye damage.

Toxic to aquatic life with long lasting effects.

Important product advantages

- Easy to use, even for the private user
- Burnishes aluminium surfaces to a black finish
- Ideal for touching up scratches and rub marks
- For blackening smaller complete components
- Abrasion-resistant
- Permanent
- Very efficient
