

Product information

IT WORKS.

BALLISTOL BRAKES AND PARTS CLEANER

Product Features

For cleaning and degreasing brakes, brake discs and machine parts

Special Features

High cleaning performance of organic fat residues due to special formulation with citrus extracts

Vents without residue

Free of acetone, silicone, PTFE, N-hexane and acid

In use by leading motorbike manufacturers

Application / Practical Tips

Oils, grease, adhesive residues, dirt and even dried-in, resinified oils and brake dust are removed effectively as well as graphite-, molybdenum-, copper- and aluminium assembly pastes

To treat the surfaces, simply wipe the dirt with a soaked cloth (or other)

The optimised flash-off time of the product enables a wide range of applications

Available as

Spray 500 ml
5 litre

art.no.

25340
25346

Physical and Chemical Characteristics

Appearance: colourless, clear

Smell: fruity

Flash Point: Spray approx. 12 °C / Liquid approx. -4 °C (with solvent)

Boiling Range: Spray 80 °C / Liquid not determined

Ignition Temperature: Spray approx. 425 °C (with solvent) / Liquid not determined

Vapour Pressure: Spray approx. 59 hPa (at 20 °C, with solvent) / Liquid not determined

Rel. Density Spray: approx. 0.74 g/cm³ (at 20 °C)

Rel. Density Liquid: approx. 0.74 g/cm³ (at 20 °C & with pycnometer)

Lower / Upper Explosion Limit: Spray approx. 3.5 Vol-% / approx. 15 Vol-% (for solvent) / Liquid not determined
