

# Product information

IT WORKS.

## BALLISTOL COLD DEGREASER

### Product Features

For degreasing, pretreating and cleaning all metals and plastic parts

### Special Features

Effective oil and grease remover  
Without aromatic compounds and nitro solvents  
Acetone-free, evaporates without leaving residues

### Application / Practical Tips

Suitable for complete weapon cleaning  
Ideal for preparing metal surfaces for burnishing, electroplating, paintwork or assembly work  
Also suitable for cleaning brake disks  
Application:  
Apply to the surface and wipe clean. Repeat as often as required. To finish the process, wet the degreased area generously and drain the excess. After drying, the surface is free of grease and is ready for further treatments and finishes.

Available as	art.no.
Spray 50 ml	23356
Spray 200 ml	23360
5 litres	23390

### Physical and Chemical Characteristics

Appearance: colorless, clear; odour: solvent-like  
Boiling range: spray approx. 56 °C / liquid approx. 60 °C  
Melting temperature: < -90 °C (DIN/ISO 3016)  
Flash point (solvent): < 0 °C  
Ignition temperature: spray approx. 540 °C / liquid not determined  
Lower/upper explosion limit (solvent): spray approx. 2/approx. 13 Vol-% / liquid approx. 2/approx. 10 Vol-%  
Vapour pressure: approx. 250 hPa  
Relative density: spray approx. 0.8 g/cm<sup>3</sup> (pycnometer) / liquid approx. 0.7 g/cm<sup>3</sup>  
Solubility in water: miscible

### Hazard Statement

**Spray:** Extremely flammable aerosol. Pressurized container: May burst if heated. Causes skin irritation. May cause drowsiness and dizziness. Toxic to aquatic life with long lasting effects. **Liquid:** Highly flammable liquid and vapour. Causes skin irritation. May cause drowsiness and dizziness. Toxic to aquatic life with long lasting effects.

### Important Product Advantages

- Easily removes oil, grease, resin residues and adhesive residues
- Dissolves inorganic grease
- Neutral towards plastics
- Acetone-free
- Evaporates without leaving residues
- Effective preparation of metals for burnishing or electroplating
- Ideal for cleaning brake disks and preparing surfaces for paintwork
