# APPLICATION OF DRY CLEANER & DETAILER

## USE AS A DRY CLEANER

Slightly dirty or dusty paint can be treated immediately without water.

**1.1.** Spray the paint thoroughly with the cleaner.

**1.2.** Clean with the high-pile microfiber cloth until the surface is clean.

**1.3.** Polish with another high-pile microfiber cloth.

### Result:

Clean paint with tremendously deep shine and extreme beading coating

## USE AS A DETAILER

Clean the paint by hand or in the car wash as usual. Proceed as follows.

### 2. Dry application:

**2.1.** Spray the detailer on the short-pile microfiber cloth / soft cotton cloth and spread on the paint.

**2.2.** Then polish with the high-pile microfiber cloth.

**Advantage:** Extreme beading coating and tremendously deep shine

### 3. Wet application:

**3.1.** Spray detailer on wet paint.

**3.2.** Dry with microfiber drying cloth. The detailer spreads when drying.

**Tip:** Improved spreading of the detailer when using a cotton cloth. Then polish with a high-pile microfiber cloth.

**Advantage:** Time savings

### 4. Result:

Perfect lacquer finish with an excellent beading effect.

*Strength of the roll-off effect depends on wet or dry application.*

**Please note:** Shake well before use. Do not use in the blazing sun or on heated surfaces. Do not allow to dry. Protect contents against frost.

IT WORKS.
